Electronics

- Good understanding of digital logic
- VHDL
- Modelsim
- Multisim and other simulation software

Soft Skills

- Hardworking
- Self-learner
- Good organization skills
- Attention to details
- Teamwork skills
- Self-motivation and persistence
- Planning and time management

Volunteer Work

(March 2017 –
May 2017)

Metanoia Student Group

Metanoia is a student activity aiming towards providing our colleague students with different recourses to enhance their performance and have a better learning experience. Through the past few months, in collaboration with other volunteers, I've had the chance to work on preparing different study materials, such as summaries and mind maps. Also, this experience has enhanced my teamwork skills, and has taught me to simplify complicated concepts and present them in an easy-to-understand inviting way.

(October 2017 –
January 2018)

EED Student Group

Academic Committee Member
